Project Name	CAB BOOKING
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Cab Booking System identifies common transportation problems faced by passengers, such as difficulty finding nearby cabs, long waiting times, uncertain fare prices, and lack of ride tracking. The proposed solution addresses these challenges by providing an easy-to-use online platform for ride booking, real-time driver tracking, fare estimation, and secure user management. This ensures that the solution effectively meets customer needs while improving convenience, safety, and overall travel experience.

Purpose:

- ☐ Solve transportation problems by providing a fast, reliable, and user-friendly cab booking platform.
- ☐ Improve customer convenience through instant ride booking, fare estimation, and efficient driver matching.
- ☐ Enhance user experience with secure login, booking history, and real-time ride tracking.
- ☐ Build customer trust by offering transparent fares, reliable service, and easy ride management.
- ☐ Understand passenger and driver needs to continuously improve the platform with better features and services.

Template:

Define CS, fin mo CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? - Daily commuters - College students - Office employees - Tourists - Cab drivers	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices. - High fare during peak hours - Limited availability of cabs - Safety and trust issues - No real-time tracking in local services - Dependence on cash payments	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking. - Local taxi services - Auto rickshaws - Phone call booking - Existing cab booking apps - Carpool with friends/colleagues	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides. - Book a cab quickly and reach the destination on time - Get a safe and reliable ride - Track the ride in real-time - Pay digitally and get invoice - Manage ride history and receipts - Drivers: Get more ride requests and maximize earnings	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations. - No efficient real-time cab matching - Lack of nearby driver visibility - Manual booking is time-consuming - Poor communication between user and driver - No centralized platform for ride management	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace) - Search for cabs on road or call local numbers - Use multiple apps to compare availability - Wait longer during peak hours - Cancel rides if driver takes too long - Prefer cash payments	
Focus J&P, tap into EE, understand RC	3. TRIGGERS TR What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. - Need to reach office/college on time - Bad weather - No personal vehicle available - Urgent travel plans - Special events or occasions	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. RideReady is a smart cab booking platform that connects passengers with nearby drivers in real-time. It allows users to book rides, track drivers, pay digitally, and manage ride history easily. Drivers receive ride requests based on location, reducing idle time and increasing earnings. Key Offerings: - Real-time cab booking - Live tracking - Secure digital payments - Ride history and invoice - Driver dashboard for ride management	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 - Mobile App - Website - Social Media (Facebook, Instagram, Twitter) - Online Ads - App Store / Play Store	Extract online & offline ch of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - use it in your communication strategy & design. Before: - Stress, frustration, uncertainty - Worry about availability and fare After: - Relief and satisfaction - Safe and comfortable journey - Trust in the platform		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. - Word of mouth - Local flyers and posters - Taxi stands and public transport areas - Customer support call	
Identify strong TR & EM
